SOURCE

1. The landing field at Tutow (N 54/P 60) was not farmed, but was in poor condition. All the hangars were destroyed. The field was not occupied. Volkspolizei were quartered in two buildings of the Tutow settlement. About 15 dummy aircraft, apparently mounted on revolving disks, were standing on the landing field.
2. A local resident said that the field was blocked on week-days by Volkspolizei and was used as a ground target by Soviet aircraft on Tuesdays, Thursdays and Fridays. Mostly single-engine, but sometimes twin-engine, planes allegedly fired with machine guns and aircraft cannons. *

☐ Comment. The status of the field and the firing practice were confirmed ☐ The field, which is unoccupied, is used for firing and bombing practice from the air by fighter units of the northern fighter corps stationed in the Soviet Zone of Germany.
